DIPLOMA OF VOCATIONAL EDUCATION AND TRAINING (VET) QUALIFICATION

On the 05th April 2016, the (TAE50111) Diploma of VET qualification, was superseded by the TAE50116 Diploma of VET.

The audit and review requirements to apply to offer this new qualification on scope of registration for any RTO are significant and will take quite awhile to address, so please understand that we are doing all we can to ensure you are able to work towards achieving the most current industry qualification requirements.

What are the changes for the new TAE50116 Diploma of VET qualification?

The updated Diploma of VET qualification (TAE50116) has ONE new core unit:

- TAELLN501: Support the development of adult language, literacy and numeracy skills

Can I still enrol in the superseded Diploma of VET (TAE50111) qualification now?

YES. The TAE50111 qualification is the only version of the Diploma of VET qualification that is presently available to study until RTOs can apply for this new qualification on their scope or registration. This qualification currently still meets the minimum requirements for VET Trainers as per the Standards for RTOs 2015, Schedule 1.

You can still enrol in the TAE50111 Diploma of VET with Connect Training Group as we have a ‘train out’ period to still deliver and assess this till the 05th October 2017.

Having this older qualification will also provide you with a quick upgrade to the new qualification once RTOs manage to get this added to their scope of registration.

Connect Training Group will offer our students’ a special pathway to ensure their qualifications are to the current standard.

What do you need to do if you currently hold the superseded (TAE40110) Certificate IV in Training & Assessment or the (TAE50111) Diploma of VET?

At this stage there is no action required as your qualification still meets the minimum requirements under the Standards for RTOs (Clauses 1.14, 1.15 and 1.23 and Schedule 1). We imagine that in time this will change.
